ANNEXURE – I

- I. **Name of the Scheme:** Dikri Development Scheme
- II. **Department:** Department of Health and Family Welfare, Dadra & Nagar Haveli & Daman & Diu.
- III. **Introduction:-**

U. T. of Dadra & Nagar Haveli & Daman & Diu, Directorate of Medical & Health Department is catering to deliveries across various Health Centres. The sex ratio in the U.T. is not very encouraging. The UT is behind the ideal sex ratio of 950 which maintains the balance between the number of girls boys ratio. In order to improve the sex ratio at birth, the Administration designed a scheme named “**Save the Girl Child**” in the erstwhile UT of Dadra & Nagar Haveli and “**Dikri Development Scheme**” in the erstwhile UT of Daman & Diu. Along with improving the sex ratio this scheme will also be helpful in reduction of Low Birth Weight Babies & also premature births which are the major causes of Infant Mortality.

It has also been witnessed that multiple pregnancies with decreased spacing leads to increased chances of Maternal Mortality and Infant Mortality. The scheme would thus help in reducing these chances of prematurity and low birth weights which ultimately leads to improvement in infant Mortality Rate and Maternal Mortality Rate apart from improving/maintaining the sex ratio at birth.

- IV. **Objective :- “Saving girls”** as primary objective, with other objectives being to:
- **Improve the Sex Ratio at birth** : The scheme envisage no female foeticide in the districts of Dadra & Nagar Haveli & Daman & Diu. For the said vision the UT Administration deposits a sum on the name of the girl child, which she can utilize for her higher education or social obligations like marriage. The financial support which the UT provides is a drop in ocean when it comes to saving girls when we talk about entire nation. The Administration in its quest to save the girls of this territory has undertaken this noble cause on its shoulders and is sustaining the scheme over a decade now. The Sex Ratio which used to be around 920 in DNH & 904 in Daman & Diu (Census 2011) which has improved and has touched 930 now (CRS) which in itself is a feet. But to maintain and bring the sex ratio to 950, the scheme is proposed to be continued in coming years too.
 - **Promote Institutional Deliveries :-** The criteria’s for availing the policy/ scheme ensures that the delivery takes place in an Institution/Hospital/Nursing Home which automatically ensures promotion of Institutional Delivery which has risen from 80% to 99 % over last 12 years. The scheme also aims at bringing the Maternal Mortality to Zero and Infant Mortality to single digit number.

- **Reduction in Maternal Mortality, Infant Mortality:** - The eligibility criteria's include the age to be 18 years complete which prevents teenage pregnancies and gives the mother and the child to have a healthy growth & discourages early marriages. The premature births are seen to be low over the age group of 18 years.
- **Increased uptake family planning services:-** The delayed pregnancy till the mother is 18 years helps in preventing early pregnancy and thus increases the usage of contraceptives, which in turn helps in improving the Total Fertility Rate. Also the criteria of only first two girl child shall get the benefit of the scheme also helps in controlling the size of the family.

V. **Target Beneficiaries/ Scope:-**

- All the eligible couples above 18 years and delivering a girl child are eligible under the scheme. The target group consists of all those couples who are domicile holder of DNH & DD districts. The first two living girl child are eligible for the said scheme.
